RISK SOLUTIONS

Capability Statement

Practical Risk & HSE Leadership for Growing Contractors

Who We Are

Pioneering Risk Solutions helps contractors and project teams meet client scrutiny, strengthen governance and deliver safely on site, without the roadblocks. We bridge the gap between corporate expectations and field execution with proportionate, commercially aware risk and HSE support.

Veteran Owned
Recognised veteran-owned business status

Procurement Ready
Defence and Tier 1 panel experience

Field Tested
Executive and site-level delivery

Phone: 0400 637 082

Email: jason@pioneeringrisksolutions.com.au

Location: Townsville, QLD. Australia-wide by arrangement

Talk directly with the principal consultant — no junior teams, no handover delays.

Our Services

Enterprise Risk and Governance

Enterprise risk frameworks, governance support and reporting that gives your leadership team clear visibility without adding red tape. Built for businesses stepping up into larger contracts, tenders or panel work.

Audit, Assurance and Readiness

Gap assessments, internal audits and readiness reviews that get you prequalified and panel ready. Right sized for your business, whether you're preparing for a tender, a client audit or your first supplier panel application.

Incident and Advisory Support

Serious incident support, factual review and embedded advisory support when you need an experienced hand fast. For businesses managing an active incident, a regulator interaction or a gap in leadership capacity.

HSE Systems and Operational Uplift

Practical development and review of your WHS management system, critical control uplift and field ready procedures. Suited to contractors and project teams who need systems that hold up under scrutiny and actually get used on site.

Site and Project Critical Risk Controls

Remote and isolated work controls, site management planning and contractor interface management for complex or high hazard environments. Built for teams working across remote, multi contractor or logistically demanding project sites.

Why Pioneering Risk Solutions

Boots on the Ground, Not Desk Bound
You get a principal who shows up on site, not a consultant you only hear from once the invoice lands.

Commercially Aware Advice
Solutions built around your budget, schedule and delivery pressures, not textbook compliance for its own sake.

Veteran Owned and Procurement Ready
Recognised veteran-owned status gives you an edge with Defence and Tier 1 procurement panels.

Executive Experience, Field Tested
Years leading risk and HSE at executive level, now applied directly to your project.

Ready to talk through your risk, HSE or governance needs?
